SPECIAL EFFECTS PAINTS

STONE EFFECT

APPLICATION INSTRUCTIONS	To ensure evenness of colour, pour all cans of Stone Effect into a clean dry container. Stir thoroughly prior to use to ensure even distribution of effect particles. Before you begin, test your chosen application method on a large piece of board. Craig & Rose Stone Effect requires two coats to achieve the desired effect. Working in small sections, approx 1m x 1m, apply paint with a brush to areas not accessible with a roller. The first coat can be applied with a brush or roller. The second or final coat must be applied with a wide brush in a random brush stroke action to achieve the stone effect. Make sure to overlap brushed areas to achieve an even effect. Avoid touching up. Rolling alone is not recommended. Not suitable for high wear situations, interior wet areas or surfaces with varying porosity.
RESTRICTIONS ON APPLICATION AND OVERCOATING INSTRUCTIONS	Ensure the previous coat has fully dried for 4 hrs before over coating. Do not apply in temperatures near freezing as this will seriously slow down the drying and may destroy the structure of the paint. Store in a frost-free place and do not allow the paint to freeze. Do not apply to highly absorbant surfaces.
CLEANING	Remove as much paint as possible from equipment before cleaning with water. Clean hands with warm soapy water.
SAFETY PRECAUTIONS	Ensure good ventilation during application and drying. After contact with skin, wash immediately with plenty of soap and water. In case of contact with the eyes, rinse immediately with plenty of water and seek medical advice. See can label for full instructions. Safety Data Sheets are available on request.
VOC CONTENT (VOLATILE ORGANIC COMPOUNDS)	2004/42 EU Limit value for this product (Cat A/I : 200g/L) This product contains Max : 3.5g/L VOC. *****
DISPOSAL & ENVIRONMENT	Please dispose of unused paint and container responsibly. Do not empty into drains or watercourses. Some local authorities have special facilities for the disposal of paint.
